

Recommendation Letter

To whom it may concern

It is with great pleasure that we recommend Mr. Mudunuru Neeraj for his valuable contributions and dedicated service during his tenure with COE Security LLC as a Cybersecurity Engineer.

Throughout his time with our organization, Neeraj demonstrated strong technical capabilities, excellent communication skills, and a proactive approach toward cybersecurity operations, client coordination, and process improvement initiatives. His ability to manage both technical and operational responsibilities made him a dependable and valuable member of our team.

Neeraj played an important role in handling initial client communications and coordinating with clients to understand project requirements, onboarding activities, and operational expectations. He consistently ensured smooth communication between internal security teams and clients throughout the project lifecycle.

He also conducted extensive Open Source Intelligence (OSINT) research to gather information related to key stakeholders and certification bodies, supporting business and operational requirements effectively. His research-oriented approach and attention to detail contributed significantly to project preparation and coordination activities.

In addition to client-facing responsibilities, Neeraj prepared and maintained project-related documentation covering client requirements, project updates, internal workflows, and progress tracking. His documentation practices supported operational transparency and improved project coordination across teams.

Neeraj actively supported end-to-end client handling processes from project initiation through completion, ensuring timely updates, task tracking, and smooth collaboration between technical teams and external stakeholders.

From a technical perspective, he contributed to cybersecurity research and engineering initiatives by exploring remote IoT penetration testing devices and evaluating their cybersecurity use cases. He also assisted in strengthening the organization's AI-based penetration testing tool by contributing enhancement suggestions and supporting security hardening efforts.

He further assisted in SOCI and security environment setup activities, including technical configurations required for operational readiness. One of his notable contributions involved

creating and configuring a secure VPN tunnel between client environments and the internal security engineering team, enabling secure penetration testing access while maintaining communication security standards.

Neeraj also performed detailed analysis of the Nidhi Portal used for client communication and project tracking. Based on his analysis, he suggested workflow and usability improvements that enhanced communication efficiency and project visibility between clients and internal security engineers.

In addition, he consistently contributed to technical research, cybersecurity process enhancements, and internal operational improvements across multiple security-related projects. His collaborative approach and willingness to support both technical and non-technical teams reflected his strong sense of responsibility and professionalism.

Neeraj maintained excellent coordination with clients and internal teams, ensuring timely communication, project updates, and successful task completion. His professionalism, adaptability, technical curiosity, and commitment to quality work were highly appreciated within our organization.

We sincerely value his contributions to COE Security LLC and confidently recommend him for future professional and academic opportunities. We believe he will continue to demonstrate the same dedication, technical aptitude, and professionalism in all future endeavours.

Should you require any additional information, Please feel free to reach out for any additional information at jasmitharouthu@coesecurity.org.

Sincerely,

Jasmitha Routhu
